"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or Water Rights in California, and (3) Appropriation of Water in California. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to

appropriators.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Walter Moore  
Director of Conservation  
Peninsula Open Space Trust  
3000 Sand Hill Road  
Building 4, Suite 135  
Menlo Park, CA 94025

Dear Mr. Moore:

PERMIT 19321 (APPLICATION 27663), PERMIT 19322 (APPLICATION 27664),  
PERMIT 19323 (APPLICATION 27665), AND PERMIT 19324 (APPLICATION 27666); AND  
STATEMENT NOS. 9553, 9554, AND 9555 VARIOUS SOURCES AND BUTANO CREEK  
IN SAN MATEO COUNTY

This letter is to follow up a November 12, 1998 phone conversation with John Wade of your  
office concerning the ownership and status of the above-referenced water rights.

### Ownership:

Our records currently show the ownership of the water rights in the name of "City National  
Bank", with "Stanley S. Skeeahan" designated as agent or primary contact.

As requested by Mr. Wade, unless notified otherwise within 30 days, we will update our records  
to show the ownership of the water rights covered of Permits 19321, 19322, 19323, and 19324  
and Statements No. 9553, 9554, and 9555 as follows:

Peninsula Open Space Trust  
c/o Walter Moore  
3000 Sand Hill Road  
Building 4, Suite 135  
Menlo Park, CA 94025  
(650) 854-7696

There are no fees required to change the ownership of the water rights.

*Rduff* 11-16-98

KSN 11-13-98

NOV 16 1998

**Background:**

All individuals, businesses, or public and private entities diverting surface water (including ground water flowing through known and definite channels) must have a valid water right for the diversion. California recognizes a number of different types of water rights. The two most common types of water rights are *riparian* and *appropriative*.

Riparian water rights usually come with owning a parcel of land that is adjacent to a source of water. The riparian water right entitles the diverter to use a portion of the water naturally flowing past the property. Riparian water rights do not entitle the water user to divert water to storage in a reservoir or to use water on land outside of the watershed. Riparian water rights do not require a water right permit, license, or governmental approval.

Appropriative water rights can be obtained by individuals, businesses, or other entities that: (1) do not have valid riparian rights, (2) who plan to seasonally store water in a reservoir, or (3) who plan to use water on parcels that are not adjacent to the source of water. There are several ways of obtaining an appropriative water right. The most common approach is the application-permit-license procedure. This procedure for obtaining an appropriative water right begins with the filing of an application and associated fees with the Division of Water Rights. After environmental review, public notice, and resolution of any protests, a water right permit is issued with specific terms and conditions. The permit also specifies when the project must be completed. After project completion and the maximum amount of water has been placed to beneficial use, the last step is issuance of license that is the final confirmation of the water rights.

As discussed further below, the water rights involved with this property include 4 appropriative water right permits and 3 claims of riparian water rights.

**Appropriative Water Rights:**

In combination, there are 4 appropriative water rights, Permits 19321, 19322, 19323, and 19324, that cover a total of 11 reservoirs with a cumulative capacity of 81 acre-feet and irrigation of up to 250 acres. Copies of the permits and associated Time Extension Orders are enclosed. Note the 1993 Orders extended the permit expiration dates to December 31, 2003. By that date, all the reservoirs should be constructed, the irrigation system should be completely installed, and the maximum amount of water should have been placed to beneficial use.

When the permits expire, you will have three options: (1) issuance of a license based on the as-built projects and maximum amount water actually placed to beneficial use, (2) request for another time extension if the projects are not complete (subject to due diligence requirements), or (3) request revocation if the projects have been abandoned. Prior to issuance of any licenses, we will need to conduct an inspection of the as-built projects.

During my phone conversation with Mr. Wade, we discussed some of the special terms in the permits, particularly the bypass flow/measuring device terms (Terms 14 through 17) in

NOV 16 1998

Permit 19321. Subsequently, I found that the 1990 Order amended Permit 19321 to delete these terms. These terms apparently were deleted because a diversion point on Butano Creek was deleted that was intended to help fill Reservoirs No. 5 and 6. In any case, you should review the permits and associated orders to ensure full compliance with all terms and conditions.

Mr. Wade also mentioned that the previous owners might have constructed several additional reservoirs. There is a possibility that these reservoirs could be added, by Change Petition, to the existing permits, provided that they are in the same watershed and the total storage capacity allowed in the permit(s) is not exceeded. Enclosed for your information is material related to the Change Petition procedures.

An appropriative water right can be revoked (or reduced) after five years of continuous nonuse, or due to noncompliance with permit terms and conditions. To track the status and actual water use under the terms and conditions of the permit, we annually distribute a pre-printed form, "Progress Report by Permittee". We have no record of receipt of the 1997 Progress Reports. Enclosed for your completion are duplicate copies of the 1997 Reports reflecting the new ownership. In early 1999, we will distribute the 1998 Progress Reports. There are no fees required to file the Progress Reports.

#### **Riparian Water Rights:**

Statements 9553, 9554, and 9555 (copies enclosed) cover 3 diversions from Butano Creek under claim of riparian right. A valid riparian right (or pre-1914 appropriative right) is a vested right that is generally superior to any appropriative right administered by the Division of Water Rights under the Water Commission Act of 1914.

The validity of a claim of riparian right often involves complex issues of fact and law regarding stream contiguity, land ownership issues, and chain-of-title. Because a riparian does not require a permit, license, or governmental approval, it is our policy not to render any advisory opinions regarding the validity of a specific claim of riparian right.

However, the Division of Water Rights does maintain statewide records of surface water diversions initiated under claim of riparian rights (and pre-1914 appropriative rights). Use of water under a claim of riparian right or pre-1914 appropriative right is documented by filing a "Statement of Water Diversion and Use" (Statement). A Statement is completed for a diversion during a calendar year and should be filed before July 1 of the succeeding year. We assign each new Statement a unique number. Thereafter, we distribute pre-printed Supplemental Statement forms at three-year intervals for the owners to summarize their actual water use.

We have not received any water use summaries for the 3 riparian diversions from Butano Creek since the late 1980's. Enclosed for your completion are duplicate copies of the Supplemental Statement forms for the three-year intervals ending in 1995 and 1998 for each riparian diversion. There are no fees required to file the Supplemental Statement forms.

Walter Moore

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

Re: Your Reference No. 341:SO:27663

Gentlemen:

This letter will acknowledge receipt of your correspondence dated January 3, 1991. A copy of your letter is enclosed for reference. Please change your records to show that Application No's. 27663, 27664, 27665, and 27666; as well as Statements of Diversion and Use No's. S-9554 and S-9555 are held by:

"Chase Trust Company of Arizona as Trustee under  
the Roy E. Crummer and Hazel B. Crummer Living  
Trust Indenture, dated June 7, 1965."

Your assumption that we do not have copies of the Permits and Statements by the previous owner are correct. Please consider this letter as our request that you forward copies of the Permits and Statements to the attention of the undersigned.

Thank you in advance for your assistance regarding these matters.

Very truly yours,

Thomas G. Rumph  
Senior Vice President

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1987. (Additional information on reverse side of this form.)

- A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.
- Amounts below are: ☐ Gallons ☐ Acre-feet ☐ \_\_\_\_\_ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1984				x	x	x	x	x	x	x			
1985				x	x	x	x	x	x	x			
1986				x	x	x	x	x	x	x			

- B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

120 Irrigation 120 acres artichokes, occasionally also a few acres of vegetables.  
Stockwatering 50 head  
Domestic  
Other (specify)

- C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

45 an electric pump-25-hp. was installed several years ago, it has a capacity of 450 gpm. This replaced the old 250 gpm portable pump.

Water is pumped from Butano Creek into a reservoir at #1. It is then pumped either

to the low land area under statement #9555 or the high land area under #9553.

- D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.
